1 • Executive Summary

ZimValue Protocol (ZVP) is a Solana-based utility token that securitises a \$130 M portfolio of five proprietary therapeutic formulas and an expanding IP pipeline targeting nutrition, neuroprotection, immunology, genomics, and cellular regeneration. By tokenising registered patents, embedding transparent liquidity on-chain, and allocating 30 % of supply to an institutional reserve, ZVP bridges scientific R&D, emerging-market healthcare, and DeFi. Revenues generated by licensing and product sales fuel buy-back, burn, and community staking rewards, while milestone triggers unlock humanitarian deployments in Africa via the future ZVP Impact Foundation.

2 • Vision & Mission

Vision: A world where cutting-edge science and decentralised finance converge to eradicate severe malnutrition and cognitive inequality.

Mission: To convert high-value biomedical IP into an open, liquid digital asset that funds research, drives real-world adoption, and delivers measurable social impact—starting with Zimbabwe and expanding globally.

3 • The Problem & Our Opportunity

- Malnutrition & cognitive decline still affect >200 M people in sub-Saharan Africa.
- Traditional pharma R&D cycles are slow & capital-intensive; IP often remains locked in silos.
- Emerging scientists and small biotech teams struggle to raise non-dilutive capital.
- Crypto markets seek real-world-asset backing and credible value beyond speculation.

ZVP Solution:

1. Tokenise IP – each patent becomes an on-chain, auditable value block.
2. Pool Liquidity – market makers and holders access 24/7 liquidity on Raydium/Jupiter.
3. Deploy Impact Capital – royalties funnel into field projects; milestone at ZVP \$0.10 = donation of NutraRegen™ patent to African NGOs.
4. Align Incentives – token holders share upside while communities receive affordable therapeutics.

4 • Scientific Asset Portfolio (5 Patents)

F-1 NutraRegen™: Severe malnutrition & cachexia

F-2 ZimKids Cognition™: Paediatric neuroprotection

F-3 ImmunoAfrica™: Immune resilience

F-4 NutraSeq™: Nutrigenomic modulation

F-5 CellRex™: Cellular regeneration & anti-inflammageing

5 • Token Architecture

Blockchain: Solana Mainnet

Standard: SPL Token v1 (classic)

Mint Address: AVWZXs4PLGvjUnYbypcum9eoKda3zwLqnzhRC2c3g7dy

Total Supply: 1,000,000,000 ZVP

Decimals: 6

Token Extensions: Not used (standard SPL); metaplex metadata pending

6 · Tokenomics & Valuation

Allocation:

- 70% Public Circulating Float – 700 M
- 30% Institutional Reserve (DrWalterSparta wallet) – 300 M

Conceptual Valuation:

- IP NPV: \$90 M, NFT Genesis: \$5 M, Royalties (5y): \$35 M → Total: \$130 M

Price Milestones:

- \$0.010: Donate NutraRegen™
- \$0.050: Launch CellRex™ trial
- \$0.100: Build nutrition hubs in Africa

7 · Liquidity & Market Strategy

Raydium CL Pool: ZVP/USDT – ~\$67 k TVL

Reserve Band: 140 M ZVP locked

Marketing Wallet: \$10k USDT

CEX Strategy: Bitget (negotiation), target Q1 2026 listing

8 · Governance & Legal Structure

Africa Ground Science LLC (Delaware): IP Holder

ZVP Tokenized Science & Global Impact Holdings LLC: Treasury

ZVP Impact Foundation (NGO): Humanitarian & DAO anchor

DAO Africa: On-chain (Snapshot + multisig)

9 · Roadmap

Q2 2025: Token launch, Raydium pool

Q3 2025: Website v2, verification, CoinGecko

Q4 2025: +\$150k liquidity, CEX listing

Q1 2026: DAO launch, patent donation if ZVP ≥ \$0.010

2026+: Multichain bridge, 3 African nutrition hubs

10 · Social Impact Framework

Patent-for-Impact™: milestone-based IP donation

Fee split: 0.5% burn, 0.5% to NGO

KPI Reports: on-chain + PDF (quarterly)

11 · Risk Factors & Disclaimers

- Regulatory: SEC/CVM classification may change.
- Scientific: formula validation may delay.
- Market: price volatility inherent to DeFi.
- This is not investment advice.
